

Fix Your Life Now Using Petroglyph Talismans **by Jim Fallon**

Most issues on one's life are the result of being out of attunement with one of the seven principles. If you look at the meanings of the seven principles and their life areas, and mark a "X" on one of the principles that seems to have been a running theme all your life. The principle with the most "x's" will be the principle that if you balance it, Make a talisman for it, most of your life difficulties will be brought into balance and harmony.

In many different religious and spiritual methodologies, some form of a talisman was used to help the seeker maintain their focus and intent either on a spiritual or area of life issue or situation. Talismans are commonly thought of to have some magical power, to either bring the seeker good luck or protection, manifesting or resolving a situation. It is used as a symbol to help the seeker focus their intent on an issue, concept or situation. Talismans were based upon the Elemental Forces or principles to bring oneself into harmony with those forces.

Talisman is something, maybe a drawing, perhaps an object, which when held in the hand/ownership of and by you, will, through innate powers vested in the Talismanic object, bring certain specialized "results" to you.

Talisman made with the general purpose/intention of enabling you to, say, have more interest in your profession will, when properly made, "work" and be fairly easy and simple to make.

A Talisman is any kind of a physical object which possesses "Magical Powers" to bring about certain desired physical happenings. Talismans for your use are to be made by you – YOU. No one can make a Talisman for you.

There are many ways as to how to use Talismans, but the simplest answer is: USE THEM: LOOK AT THEM and mentally demand they work. Actually the way Talismans work is that they DO THEIR WORK WHILE THEY ARE BEING MADE!!!

Even to the very early cave man, the fact that mankind was connected to Magic operations and to Magic pictures, designs, and objects drawn on cave walls or on mountains which clearly were Talismans. This is the magical effect of symbols upon the mind.

The very earliest of men, the "cave men," drew/painted pictures on the sides of caves, which pictures were connected with their hunting operations; some of these operations

regarding food supply and survival of the tribe. These are magical symbols (petroglyphs) carved for magical purposes.

When you create a Talisman for a certain purpose, what you are doing fundamentally is attaching a piece of the Aka to the talismanic object and causing a current of the Aka to flow toward the talismanic object and, as you are wearing or possessing the Talisman, from the talismanic object into your aura, which will strongly incline circumstances, desired circumstances, to come about, “dreams to come true,” and you have your life the way you’d like it to be.

For example, say you have always had issues with feeling burdened by everything relating to your career, say issues with boss’s or organizations, or just never felt that you were not on the right direction in your life. This is Kala. Make the talisman for Kala, and simply hold it in your hand as you are doing piko piko, from the navel to the talisman in your hand, thinking about all that Kala principle symbolizes. It is not the talisman for Kala that possesses the power, but it is invoking the powers that you already possess.

Also while doing the piko piko and holding the talisman in your hand, you could recall moments in your life when you experienced the attribute that you wish the talisman to represent for you.

Say you were going on a new job interview. Just before the interview, you could hold the talisman in your hand and recall those times in your life where interviews you had went well and you “got” the job.

The easiest way after making a talisman is to “charge” the talisman using the Dynamind technique, using the symkey method.

You could also ask your talisman for advice, simply holding it in your hand, or picture it in your mind’s eye, ask a question, then just wait for any return thought or feeling you get as an answer. That process is called “Thought Language, asking a question, and then awaiting an answer by a return thought.

Expanded Huna principles with *Life areas*:

Ike: Awareness (Knowledge/ unawareness)
