

TIPS FOR USING THE EYE OF KANALOA SYMBOL by Jim Fallon

“In ancient Hawaii people didn’t worship ‘gods’ in the Western sense of beings who existed in a supernatural plane and who occasionally came ‘down’ to Earth to interact with humans. Hawaiian ‘gods,’ called *akua* by them, were the spirits of natural forces, always visible by their effects. Like Westerners, however, Hawaiians personified the strongest of these forces, translating them into male and female and telling stories about them both for fun and to maintain cultural values. Some Hawaiians formed religions around these *akua* complete with altars, temples and priesthoods, some of them just treated them as natural forces, and some dealt with them in esoteric ways.

“One of the oldest of these *akua* was Kanaloa, considered as a male, outwardly treated as the spirit of coastal water springs and the ocean, with all its resources, and esoterically treated as the essence of the human spirit, because of the name itself. Some meanings of the word *kanaloa* are ‘secure, firm, established, unconquerable.’ *Ka* used as ‘the’ followed by *nā* as an individual word, means ‘that which relieves pain, soothes, comforts, pacifies, consoles, and *loa* means ‘very much.’

“Wooden images of Kahaloa are very rare, but those that do exist have large, round eyes, unlike other Hawaiian images. In the Kahili family, originally of Kauai, it was taught that if you looked into the eye of Kanaloa you would be healed. In their tradition the Eye of Kanaloa was represented by four circles and eight radial lines. The circles, like leis, are symbols of Aloha (Love) and the lines are symbols of Mana (Power), because another meaning of that word is ‘branching lines.’ Together they represent Loving Power and Powerful Love. The seven-pointed star in the center represents the Seven Principles of Huna. The pattern itself radiates calm, peaceful, harmonious subtle energy.”

Now For The Tips

1. Harmonize Your Home

The Eye of Kanaloa radiates harmonious energy, helping you and whoever looks at it, or wherever it is placed to bring about harmony.

Use a copy of the Eye of Kanaloa (EOK) provided at the end of this article to hang in your home or workspace for harmonizing the energy of the area. You can even carry a copy with you when you travel. Sometimes, in an area, something just feels off and not right. For example, you rent a hotel room, and the previous guests were fighting all the time, or the prior guest was very angry all the time. You can use the harmonious nature of the EOK to shift the energy of the space whether at home or away.

2. Harmonize Geopathic Stress

There is no such thing as “negative” energy, but it can happen that the natural energy under or around a home or office can be too strong for some people, or be of a pattern that conflicts with one’s personal energy field. Hanging or placing the EOK on several walls or surfaces of one or more rooms can harmonize the two patterns and make the rooms comfortable.

3. Manifesting

For manifesting a wish, you can write on a small piece of paper the desired goal and place it on the eye and this will increase the attractiveness of the goal to you or will bring the people into your life who will help you.

4. Healing

You can put pictures, objects, names of persons on the EOK symbol in order to help with the healing of any problem they have. You can actually treat people in this way, or animals. It helps them to become harmonized with the energy around them. You can also hold the palm of one hand over the symbol, and place the palm of the other hand over the area of the body needing healing, and perform the technique of Kahi between these points. It can be used for distant healing as well. In this case, you imagine the EOK over or around the person or animal you want to help. The effect is in no way whatsoever limited in space or time.

5. Harmonizing Situations

The EOK is not just good for people or animals. By using your imagination or a digital representation of the EOK on a map, you can place it over an area that needs harmonizing. Examples of this are forest fires, hurricanes, drought-stricken places, disaster areas and places of conflict. The EOK is not a magical symbol that heals all problems. What it does is to radiate harmonious energy to amplify existing harmonious intentions and potentials. In practical terms, it assists those in the area, human or not, who are already working toward relief and harmony. The more people who are doing this at the same time, of course, the greater the amplification toward resolution.
